DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. In line 4 "bauxite" is misspelled.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1, 3, 5, 7, 11, 12 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suss et al. 4,558,075, Rittler 4,777,206, Kojima et al. 6,103,805 or Topolkaraev et al. 6,451,895.

7. Suss et al disclose polymer, organoclay and their concentrations in claim 1, calcium carbonate (chalk) in column 7, line 13 and polyesters in column 4, lines 8-49. Rittler teaches polymer and phyllosilicate in claim 1, molded article and film in claims 2-3, polyester and polyvinyls in claim 7 and talc, calcite and inorganic glasses in column 7, lines 49-53. Kojima et al. recite layered silicate in claim 1 and column 3, lines 22-25, polyethylene, PVC, PET and PBT in column 5, lines 44-46 and talc and calcium carbonate in the paragraph overlapping columns 5 and 6. Topolkaraev et al. reveal polymers and organically modified clay in claim 1, polyesters in claim 4 and talc and calcium carbonate in column 9, lines 51-52. A cable or wire coating is the intended use and as such it has no patentable significance. It would have been obvious to one having ordinary skill in the art, at the time the invention was made, to select applicants' ingredients from a list of equivalents.

Allowable Subject Matter

8. Claims 9, 16-22, 24 and 26-28 are allowed.

9. Claim 4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

10. Claims 6, 23 and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the

limitations of the base claim and any intervening claims.
